FISHERIES AND AQUACULTURE

The Fish-Vet Dialogue: Improving communication and collaboration in aquatic organism health management

This publication focuses on aquatic animal health management and biosecurity; disease investigations; and emergency response. This includes the results of a survey on country organizational arrangements for aquatic organism health and aquaculture biosecurity matters, such as the impacts of the COVID-19 pandemic.

(172 pp.) FAO Fisheries and Aquaculture Circular

FORESTRY

Applying responsible land-based investment models in forestry

Through sharing best practices from across the world, this publication promotes responsible investments in large- and medium-scale forestry activities. It focuses on the application of global instruments, which are complementary in promoting investments: They recognize local tenure rights and foster inclusive business models and meaningful partnerships with local stakeholders, such as Indigenous Peoples, women, youth and vulnerable groups.

Manual OCDE-FAO para empresas sobre deforestación y debida diligencia en las cadenas de suministro agrícolas

This handbook helps companies incorporate considerations on deforestation and forest degradation into their corporate due diligence procedures. It demonstrates how the OECD-FAO Guidance can be applied to address deforestation by contextualizing existing recommendations and directing users towards helpful sources of due diligence information.

Towards the green transition: Stimulating investment and accelerating permits for low emissions infrastructure

To meet their international climate commitments and strengthen renewable energy production, many countries will require significant new investment in low emissions infrastructure. This paper describes the challenges and opportunities for using regulatory, stakeholder engagement and public procurement tools to help countries deliver more effective permitting.
